PROFESSIONAL NON-TEACHING EXPERIENCE

to present - Management and training Consultancy (liberal profession)

My activity proceeded along two axes:

Center 1: the council. For this reason I carried out my activities in the field of the futures markets then bank and finally in property development and the reorganization of P.M.E

In the field of the futures markets

I realized, on behalf of the Chamber of Commerce and Industry of Lille Roubaix and Tourcoing, the feasibility study of the creation of a future market of Potato (with Michel Levasseur and Etienne Tiberghien). This study led to the creation of the market (6th futures market of commodities created in France)

I realized, on behalf of the Town hall of Nantes, the feasibility study of the creation of a future market of the beef. Taking into account, recommendations of my study, the creation of a future market was not carried out

In the field of the bank

I took part in the definition of the policy of risk management in two credit institutions and to help to develop the tools for valorisation of the options hidden in the assessment mainly on the products of saving housing and loans on real property

In the field of property development

I took part in financial arrangements for the creation of hotels in the Paris area, the North of France and Belgium. The objective being to optimise the structure of financing, to find the investors and the lenders

In the field of the reorganization of companies

I contributed to operations of bringing together of companies (clinical, service firm.), at the same time on the valorisation of the credits and the definition of the structures adapted to the investors

Center 2: formation. I have mainly carried out my activity near credit institutions

On behalf of the Caisse d'Epargne

A) Teaching engineering and formation:

Leaders of the “Caisses d'Epargne” of the Nord/Pas-de-Calais Area to the management of the financial instruments of market at the disposal of the banks

Financial managers to the management of interest risk

the commercial ones with the management of the local authorities and the financial analysis of these institutions

the commercial ones with the financial diagnosis of company

the commercial ones with the products of the money market

Internal auditors with the diagnosis of the local authorities

Portfolio managers to the management of interest risk

B) Teaching engineering of the institutional training schemes regionalized (B.A.1.) for the training of the employees to the managerial positions

C) Formation with the economic environment and the Finance of the employees within the framework of institutional courses B.A.1. (Area NPC) professional platform (PACA and Ardennes Champagne) and P.A.I. (NPC and PACA)

On behalf of the Credit du Nord

Participation in the “Ecole des cadres”. Teaching engineering and formation with the economic environment and banking Finance

On behalf of the Caisse Nationale du Crédit Agricole

Formation with the finance of the executives and employees of the service of the presidency of the group CA. The objective was to show how creates for itself the result in the group and which would be the consequences of the setting in market of the vehicle of quotation on the management of the Crédit Agricole
